

# Pipe Carrier

Storage with Pipe Carrier Premium

Pipe Carrier Premium with anti-skid

**Pipe Carrier Premium:**

- For transport and storage
- For train and truck
- Only 5 carriers cover range
- Optimal support, less stress
- Safe for coated pipes
- For long term use
- 100% reliable
- Easy to store
- Weather proof
- Available for renting

**For pipe diameter range:**  
Ø 114,3 - 508,0 mm

Pipe Carriers placed on concrete

## Pipe Carrier Premium

Our Pipe Carrier Premium improves all storage and transport operations. The logistic processes of tubes and pipes are simplified with only 5 carriers that cover a diameter range from 114,3 till 508,0 mm. The system provides possibilities for bundling tubes, allowing efficient handling and transport of many tubes simultaneously.

Each carrier has a length of 1,225 m. Two carriers beside each other use the full truck width (2,45 m) resulting in the optimal truck load configuration. Because the carrier is designed to be canting proof, maximum transport safety is provided.

With the Pipe Carrier Premium pipes are supported sideways. This results in less stress for pipe and coating due to a better distribution of forces. An additional advantage is that one model of the Pipe Carrier Premium is suitable for a certain diameter range. Less carriers are needed to cover different sizes.

Pipe Carrier Premium is made out of UV-stabilized recycled LDPE with a high load bearing capacity. The LDPE surface respects any coating layer and no parts are sticking out, making them safe for coated pipes. The system is weather proof, reusable and highly durable for short and long term storage.

**Available models Pipe Carrier Premium:**

Type	Pipe Ø range [mm]	Pipe Ø range [inch]	Pipes/Carrier
Pipe Carrier 6	114,3-204,2	4,500-8,000	6
Pipe Carrier 5	177,8-245,0	7,000-9,625	5
Pipe Carrier 4	219,1-306,3	8,625-12,000	4
Pipe Carrier 3	273,1-408,3	10,750-16,000	3
Pipe Carrier 2	355,6-508,0	14,000-20,000	2

## Slide Stop

The Slide Stop is our solution to secure top layer tubes & pipes during transport. The banana shaped elastic steel beam secures every single pipe.

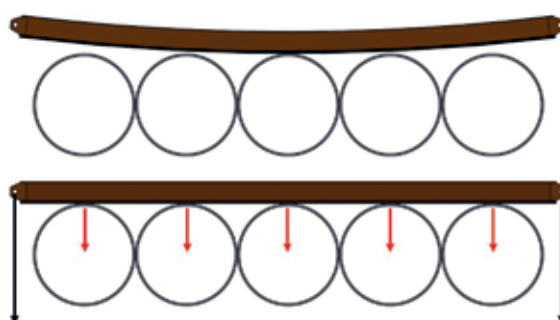

The system is easy to place with a fork lift and covered with a rubber antiskid layer to prevent coating damage. Combined with Pipe Carrier Premium and Dhatec Tie-Downs, the entire load is safe and secured during transport.

*Slide Stop applied on truck combined with Tie-Downs and Pipe Carrier*

*Pipes in the middle are not secured*

*Slide Stop secures all pipes*
